the skyscraper and the city brings together thirty years of the artist's watercolor images of cities
lepan's work goes against the tradition of presenting skyscrapers with a hard and precise

verticality the lines of these towers blur and bleed into each other into the sky and the natural world and often into the human life of the city in their sense of movement these watercolor images of bridges and baseball stadiums as well as of skyscrapers at times recall the work of John Marin while in their viewpoint they may bring to mind the bird's eye view city paintings of Oskar Kokoschka or John Hartman. LePan's paintings have been exhibited only once in a solo show in Brooklyn in 2008. Commenting on that exhibition Hartman whose sweeping canvasses have been acclaimed world wide described these watercolor works as very good and together they form a coherent and focused body of work. The Skyscraper and the City includes images from as far afield as Cape Town London and Sydney but the primary focus is on the North American city. Calgary Chicago Los Angeles New Orleans New York and Vancouver are each the subject of numerous paintings. In all over fifty cities are represented. Substantial captions accompanying many of the images discuss the circumstances in which the work was painted various aesthetic issues and the architectural history of the buildings depicted. An appendix includes examples of the artist's preliminary sketches and photographs. In a brief introduction LePan discusses the history of skyscraper art the nature of watercolor as a medium and his own background as a watercolor painter.

This history of skyscrapers examines how these tall buildings affected the cityscape and the people who worked in lived in and visited them. Much of the focus is rightly on the architects who had the vision to design and build America's skyscrapers but attention is also given to the steelworkers who built them the financiers who put up the money and the daredevils who attempt to conquer them. In some inexplicable pursuit of fame the impact of the skyscraper on popular culture particularly film and literature is also explored.

Multidisciplinary and comprehensive in scope this volume serves as an authoritative overview of scientific knowledge about suicide and its prevention providing a foundation in theory research and clinical applications. Issues relevant to clinical case management are highlighted and various treatment modalities are discussed in light of the latest research findings.
